SI-BONE, Inc. is a medical device company dedicated to solving musculoskeletal disorders of the sacropelvic anatomy. Founded in 2008, the company pioneered the surgical treatment of the SI joint with the iFuse Implant System.

Current products, including applications in spinal deformity and SI joint trauma, have expanded the company's scope within the sacropelvic space. The iFuse Implant's unique triangular geometry provides immediate stabilization, while the 3D printed porous surface facilitates osteointegration. With more than 45,000 procedures, 2,000+ treating surgeons and 80+ publications, iFuse is the leading choice in the surgical treatment of sacropelvic disorders.
